Seams sealed by combination of thermal ( hot air ) and chemical welding with triple overlap  
Rated carrying weight +/- 170 Kg  
High quality quick deflate Collier Valves  
PVC CANVAS a light colour to minimise air expansion due to heating up by the sun

**Frame** Manufactured from 25 x 25 mm powder coated aluminium 2 mm thick  
Assembled in less than 3 minutes by means of 4 cup screws and wing nuts  
On each of the 4 ends, of the saddle bars, there are pop riveted threaded inserts  
Use inserts to attach fish finders, anchors, drogue anchor etc. plus 2 plastic head bolts to do it  
Strong and smooth custom cast plastic saddles to seat pontoons on frame  
4mm stainless steel welded D- rings to attach pontoon straps to saddles  
Pontoon straps fitted with quick release and fit clips

**Transom or trolling motor / Additional Luggage rack attachment**

Manufactured from 25 x 25 mm powder coated aluminium 2 mm thick  
Can be **included** or **excluded** in less than 3 minutes assembly, by means of **ONLY 4** cup screws and wing nuts  
Transom rated for sneaker motor up to 44 Lb thrust , 18 lb thrust sufficient  
If not used for a trolling motor it can be used for cool box or live well

**Universal battery holder**

Used in conjunction with trolling motor attachment  
Most Batteries from 7.5 up to 105 Ah can be accommodated  
No extra fitting needed for fit battery , it just slips into the trolling motor frame in front of the motor

**Seat** Plastic stadium seat with the essential leg, bottom and back support for 8 or more hours on the water  
Strengthens the frame and is fixed to frame with only 2 of the 4 cup screws and wing nuts used

**Collapsible plastic luggage crate**

Luggage capacity 47 X 35 X 24 = 39.48 lt  
Due to design it does not need to be fastened  
Fits perfectly on either side of seat to accommodate left or right handed casting  
Collapses for storage or transporting

**4 Rod rod holder**

Custom made and can be fitted right or left , rods tips facing front or back as preferred by you  
Manufactured of high density foam to grip rods and reels securely and protect them from scratches
